Subject: FW: Human exposure communications materials mentioned on SF DD call
Attachments: UPDATED_HENUC_com_planning_tool_1_23_18.docx; Human Exposure webpage copy 1 23 2018 clean.docx; HEID Paragraphs 01_25_2018.docx; R8 HENC paragraph updates 1_25_2018.docx

Doug, Deb and Patrick – On January 31, 2018, Headquarters is planning to do a soft release via a searchable web tool of the Superfund sites that are human exposure not under control (HENC) or have insufficient data to make a determination on human exposure (HEID). This information is currently available to the public on EPA's webpages, but it is difficult to get to without specific directions.

The attached information includes:

- a draft communications plan
- the web language, including Qs and As that will accompany the tool
- the paragraphs for the 11 HENC and 9 HEID Region 8 sites that will be posted.
 - Please note, there is a line under each paragraph with the date when the site is anticipated to be Under Control, though these dates will not be visible to the public. Also note that the anticipated date that human exposure date will be under control is often very difficult for RPMs to estimate when they are near the beginning of the investigation, so they tend to be conservative.

We are providing some comments to headquarters today on the web page. If you would like to view the prototype of the human exposure indicator dashboard :

First login to the Drupal WebCMS here: <https://wcms.epa.gov/user> using your LAN ID and Password.

Then view the prototype by going here: <https://wcms.epa.gov/superfund/superfund-human-exposure-dashboard-prototype>

If you have any questions, please let me know.

Betsy
